Jung Dream analysis
Psychology East/West

1. What sort of themes do you notice in your dreams, if any?

Usually feelings from my recent life show in my dreams. Or fears of things I don't want to happen: personalities that I see in my life.

2. What characters or places or things do you respond to emotionally in your dream?

Usually places I go a lot, work school. Characters that make me respond emotional are people who I would respond to especially in person.

3. What sort of archetypal images, people, animals, places etc. do you notice in your dream?

people I know and places I go a lot.

4. Although it may be difficult or maybe even impossible to answer, based on the dream you wrote down, what do you think was going on inside of you at the time of the dream?
